

I like the convenience and STYLE of XM. I am paying for the service and love what they deliver. It is ridiculous that the FCC is considering a ban of their services at any level let alone traffic and weather. There are numerous pressing issues that need to be resolved I only wish Satellite TV could be as convenient as XM radio. I think the FCC should reject NAB's petition 04-160 and tell the broadcasters to learn to play in today's marketplace without Big Brothers help.

Thanks,

Lonnie Morgan
